

Meditech Consulting

MEDICATION MANAGEMENT

Our consultants have experience with multiple implementations assessing, designing, and implementing processes including Medication Reconciliation, Electronic Medication Administration, Bedside Medication Verification, and Electronic Prescribing. There are several strategies available for implementing these processes. Excel has guided multiple organizations in achieving a decreased medication error rate, improved Joint Commission Surveys, and increased patient satisfaction.

CLINICAL DOCUMENTATION

Excel has worked with many organizations, assessing, designing, and building clinical documentation for all departments within a hospital. These disciplines include Acute Care, Rehab, Respiratory, Nutritional Services, Behavioral Health, Dialysis, and more. We have templates and a library of documents that can be used to assist your team as starter documentation.

LAB DESIGN AND INTEGRATION

We have experienced consultants that have knowledge in assessing, designing, implementing, and optimizing the LAB module. These skill sets will assist the organization in building the tests and products necessary within laboratory, microbiology, pathology, and blood bank. Our team can assist with reflex ordering, Blood Bank validation, culture sensitivity, instrument watches, and reporting.

CONVERSIONS

Excel has a history of assisting organizations with Master Patient Index and Demo Recall, Radiology exam history, and Scanned/Archived image conversions. Our team can assist you in a successful migration strategy.

Working Toward Meaningful Use with the Meditech Product

Excel Healthcare Group, Inc. is comprised of industry recognized consultants that have assisted healthcare organizations prepare, design, and implement the Meditech Integrated system. Our team has expertise with most versions of the Meditech system including Magic, Client Server, and the 6.0 product.

Our consultants have great expertise with several high profile processes that often challenge Nursing Departments. A few examples of these processes are: Pain Re-Assessment, Medication Management, and Blood Transfusion Management. We have also assisted with immunizations and electronic prescribing.

Our team also has expertise with the financial and the ancillary applications. We have assisted organizations with the building and integration of Laboratory, Radiology/Cardiology (ITS), and Pharmacy charge master. Our financial team can assist with scheduling, admissions, scanning, and billing. Keeping your AR days in mind and making sure you have a complete Electronic Health Record.
